

CSR & ESG PARTNERSHIP DECK

Partner for Impact —
Children, Schools & Climate.

Building healthier children,
stronger schools and
a sustainable tomorrow.

OUR IMPACT AREAS

CHILD HEALTH

Preventive care, maternal
health, immunization
& digital health access.

EDUCATION

Health promoting schools,
hygiene, nutrition, life skills
& mental wellness.

CLIMATE ACTION

Tree plantation, environmental
education & sustainable
communities.

Lives
Impacted

Schools
Empowered

Communities
Strengthened

Impact
Measured

ABOUT WOMBTO18

WombTo18 is an integrated maternal, child and school health platform built for the Indian context, where care today is delivered as a series of disconnected events — a hospital visit here, a vaccination record there, a school health check somewhere else — rather than as one continuous journey.

WombTo18 replaces that fragmentation with a single digital continuity-of-care record that follows a child from pregnancy through age 18, connecting mothers, parents, doctors, hospitals and schools on one platform.

The platform covers pregnancy care, delivery, neonatal and infant care, vaccination scheduling, growth and nutrition tracking, child development, school health, preventive screening and digital health records, with population-level analytics available to government, institutional and corporate partners.

THE DOUBLE IMPACT MODEL

A partnership with WombTo18 engages two connected but distinct organisations, giving partners both commercial-grade technology delivery and audited social-sector impact from a single relationship.

	WombTo18 Integrated Care Pvt Ltd	WombTo18 Foundation
 Role	Technology platform & delivery	Community & social-equity programs
 Status	DPIIT-recognised startup	12A & 80G registered
 Partner receives	Technology Impact — platform reach, digital records, analytics	Foundation Impact — tax-deductible CSR execution & reporting

PARTNERSHIP & ESG MAPPING

Pillar	WombTo18 Programs	Relevant SDGs
 Environment	Tree plantation, clean water & sanitation drives, climate health awareness	SDG 13, SDG 6
 Social	Maternal & child health, vaccination, school health, nutrition, adolescent wellness	SDG 3, SDG 4, SDG 5
 Governance	Digital audit trails, DPDP-compliant data handling, transparent fund utilisation reporting	SDG 17

WHY PARTNER WITH WOMBTO18

- ✓ National infrastructure, not a one-off program — a continuity-of-care platform designed to operate across states and districts.
- ✓ Built-in measurement — every program is designed to run through a role-based dashboard, so beneficiary counts, coverage and spend are trackable rather than self-reported.
- ✓ Dual-structure transparency — commercial delivery through the technology entity, tax deductible execution through the 12A/80G Foundation, reported together.
- ✓ Employee engagement pathways — volunteering, health ambassador programs, mentorship and school visits, alongside financial contribution.
- ✓ Disclosure-ready — programs are structured to map cleanly onto BRSR, GRI and SDG reporting formats used by Indian and multinational corporates.

MEASUREMENT APPROACH

Impact is tracked through a standard results chain — Inputs, Activities, Outputs, Outcomes and Long-term Impact. Specific quantitative targets (beneficiaries reached, schools covered, screenings conducted, funds utilised) are defined jointly with each partner at program design and are reported on the partner dashboard; the partner dashboard; this document does not project figures ahead of an agreed program scope, in keeping with WombTo18's evidence-based reporting standard.

NEXT STEPS

We welcome a scoping conversation to align a partnership to your organisation's CSR budget cycle, ESG disclosure calendar and geographic priorities.
